We need to let our stand-by and week-end operators know about this work in case they break the forcemain.

FYI,

This is the person who contacted me in regards to the "Sesko" Beach Cleanup. They have not called for locates and are planning to remove and replace large quantities of beach material directly around CSO Outfall 10A and the 12" low pressure sanitary force main. The work will be through the night and they will be trucking material in and out of Pennsylvania Ave. We will attempt to locate our utilities ASAP. However locates in this area can be time consuming and of mixed success. I was advised that the cleanup will proceed as scheduled commencing this week basically whether we have located our utilities or not. Just for the record this is the first request I am aware of for locates. Though we are proceeding ASAP I advised that they still need to call formal locates.

I will check with Chris for repair parts and advise standby people of the situation just in case.
